

AirMenu

*API - Send orders to your POS software by
E-mail*

13-03-2013

To receive the AirMenu orders in your POS software via e-mail, you just need to configure the e-mail notifications in your AirMenu back office.

In the back office, click on your restaurant, then on Edit and Menus. Now click on the  in the menu you wish to configure. Click on the icon that says E-mail and insert the e-mail address you wish to send the notifications to. Now, every time a client orders from this menu, an e-mail will be sent to this address. Repeat this process in every menu you wish to sent to the POS software.

In order to register directly the orders on the POS software, the e-mail you configured to receive this notifications must be linked to the software.
